EXPERIENCE

Freelance Web Developer

01/2024 – Present

- Built an End-to-End Sports Competition Website (playu.in) featuring registration, payment processing, and form submissions, leveraging HTML, CSS, JavaScript, and Node.js, HAPI.js framework with integrated payment gateway for secure transactions.
- Developed a Random Meal Generator Website (generatemymeal.com) using HTML, CSS, JavaScript.
- Developed Portfolio Websites utilizing HTML, CSS, and JavaScript, emphasizing responsive design and custom layouts to ensure compatibility across various devices.

Full Stack Developer, Central Tech

03/2022 – 12/2023

- Implemented mobile single checkout page using DOM manipulation, reducing checkout drops by 10% and eliminating costly change requests, resulting in significant time and resource savings
- Conducted 50+ A/B tests via Google Optimize and Insider, integrating successful ones into React-based e-commerce platform
- Translated Zeplin and Figma UI/UX designs into React components using hooks, HOCs, and both class/functional paradigms
- Utilized Git for version control in collaborative React UI development
- Collaborated with QA team to swiftly resolve bugs, ensuring product stability and smooth UX
- Managed analytics using Google Tag Manager, Analytics, and Optimize 360; conducted Firebase remote config experiments
- Analysed UX with UXcam and MS Clarity; implemented fixes to enhance user experience

Catalogue Associate, Amazon

01/2020 – 02/2022

- Successfully optimized product listings for Amazon catalogue in US, UK, Canada, and Australia marketplace with JavaScript to automate tasks.

PROJECTS

Quiz Game (React): Developed an interactive quiz application using React hooks (useState, useEffect) for state management and dynamic content rendering.

Notes App (React & Firebase): Created a full-stack note-taking application using React for the frontend and Firebase Firestore for real-time database functionality.

Tenzies Game (React): Implemented a dice game using React, demonstrating proficiency in state management and event handling.

Meme Generator (React): Developed a feature-rich React-based meme generator using controlled forms, external APIs for image fetching, and state management for real-time image manipulation and user input handling.

SKILLS

Languages: JavaScript, TypeScript, Python

Technologies & Frameworks: React.js, Angular, RxJS, Node.js, Express, HAPI.js, HTML, CSS, Bootstrap, Tailwind, SCSS, Jest, Git, Firebase, Vite

Databases: MongoDB, MySQL, Firestone

EDUCATION

Bachelor of Engineering in Computer Science, Anna University

2015

React course from MDN recommended Scrimba

2024

Professional JavaScript & Typescript courses from Frontend Masters

2024
